POST-DOCTORAL RESEARCH FELLOW POSITIONS IN STATISTICS/BIOSTATISTICS
AT UNIVERSITY OF TECHNOLOGY SYDNEY, AUSTRALIA

A post-doctoral research position in statistics/biostatistics is available at University of Technology Sydney (UTS), Australia, supervised by Professor Louise Ryan, with secondary supervision by Professor Matt Wand. The position is a fairly flexible one with opportunity for the successful candidate to develop and grow their own independent research agenda. The position is funded by the Australian Centre for Excellence in Mathematical and Statistical Frontiers (ACEMS) – see https://acems.org.au/home for more details.

Professors Ryan and Wand are leading researchers in applied and methodological Statistics. They are both fellows of the Australian Academy of Science (FAA) and have received several awards for their research accomplishments.

The successful candidates will join a small but vibrant and growing Statistics group within the UTS School of Mathematical and Physical Sciences under the leadership of Professors Ryan and Wand. Professors Peter Green and Raymond Carroll have Faculty appointments and routinely visit and collaborate with group members.

Sydney is a cosmopolitan city with a mild climate, spectacular geography and a myriad of dining and entertainment options. The following web-sites provide information on life in Sydney: www.sydney.com.au and www.sydney.com.

The job location is a few minute’s walk from Sydney’s Central Railway Station. This provides a convenient link to the areas of Sydney served by its extensive railway network (www.cityrail.info/stations/network_map).

The position codes, title, and web-site is:

The web-site provides a full description of the position and mechanisms for applying. The position web-sites may also be found via: http://www.uts.edu.au/staff/jobs-uts/

The closing date for the position is 17th May 2018.
