As an institution of higher learning, the University of North Carolina Wilmington is committed to maintaining a campus environment that values diversity. The university aims to achieve, within all areas of the university community, a diverse student body, faculty, and staff capable of providing for excellence in the education of its students and for the enrichment of the university community.

To that end, I invite your assistance in identifying candidates with specific attention to minorities and women for two tenure-track faculty positions in statistics at the assistant professor level in the Department of Mathematics and Statistics (http://www.uncw.edu/math).

UNC Wilmington, one of 17 constituent institutions of the University of North Carolina, has consistently achieved regional and national recognition for its emphasis on quality undergraduate education, enriched by graduate and research programs, and the value of its education offerings. Degree programs offered by the department include a bachelor of arts and bachelor of science in mathematics along with a master of science in mathematics.

The chosen candidates will be expected to excel in teaching introductory and advanced statistics courses and engage students in research at both the undergraduate and graduate levels. Additionally, expectations for the positions include maintaining a strong research program and providing service to the department and university.

The search is open to all areas of statistics, and applicants with methodological research expertise in the area of spatial temporal models, statistical machine learning, or Bayesian statistics are encouraged to apply. Qualifications also include the potential to work with existing faculty on research.
