

## Errata

Chicken, E., 2003. Block thresholding and wavelet estimation for nonequispaced samples. *The Journal of Statistical Planning and Inference* **116** 113-129.

- Page 122, following line 3, should read

$$B_{p,q}^\alpha(M) = \{f : \|f\|_{B_{p,q}^\alpha} \leq M \text{ and, for } \alpha \geq 1, |f'(x)| \leq M\}$$

A similar correction should be made to  $\Lambda^\alpha(M)$

- Page 122, following line 7,  $|\tilde{\xi}_{j_0 \dots}|_p$  should be  $\|\tilde{\xi}_{j_0 \cdot}\|_p$
