Noel Cressie

 If you are a highly motivated postdoctoral researcher with interests in statistical computing, methodology, and machine learning, apply to join us on our grant, "Bayesian Spatio-Temporal Analysis and Statistical Computation in Very High Dimensional Problems''. You will be working in the National Institute for Applied Statistics Research Australia (NIASRA) with Distinguished Professor Noel Cressie, Professor Sumeetpal Singh, and Associate Professor Andrew Zammit-Mangion, to:

(i)   devise and implement effective Bayesian computational strategies, such as Markov Chain Monte Carlo and Sequential Monte Carlo, for high-dimensional statistical models such as Bayesian neural networks

(ii)   apply developed methodologies to recently developed Bayesian neural network architectures.

The position comes with an attractive salary and benefits. Wollongong is a highly liveable city on the beautiful Illawarra coast, about 50 miles (80km) south of Sydney, Australia.

The deadline for applications is Sunday 14 January 2024, 11:59 PM (AEST). For more details and to apply, please visit:

https://www.uow.edu.au/about/jobs/jobs-available/#en/sites/CX_1/requisitions/preview/4020/?mode=location

Enquiries about the application process: Assoc. Professor Andrew Zammit-Mangion (azm@uow.edu.au)

Noel Cressie
Distinguished Professor
University of Wollongong
